ANIMALS

Iguana virus

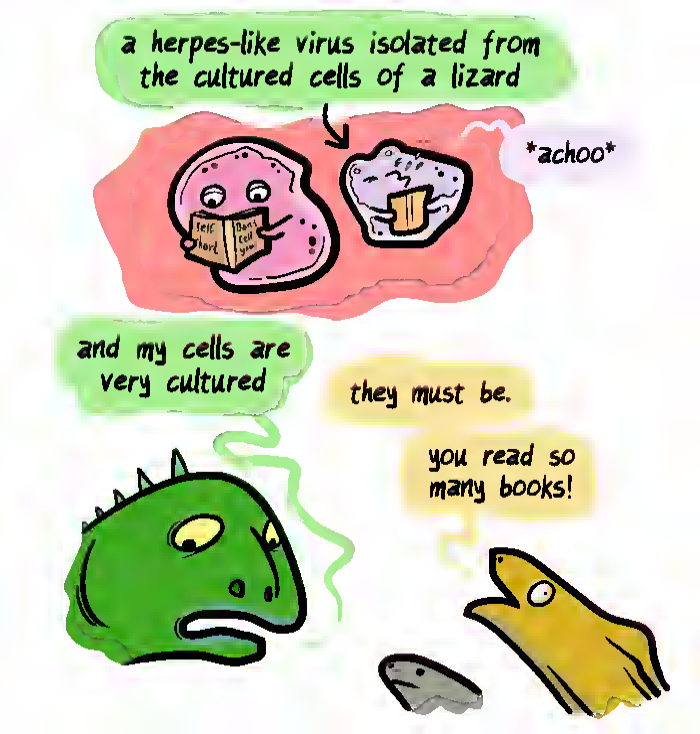
(Sequel to Ep 34: Iguana)

hey guys
hey Aleck

what the hell is that on your tail?
oh this? it's for protection
to protect you from what?

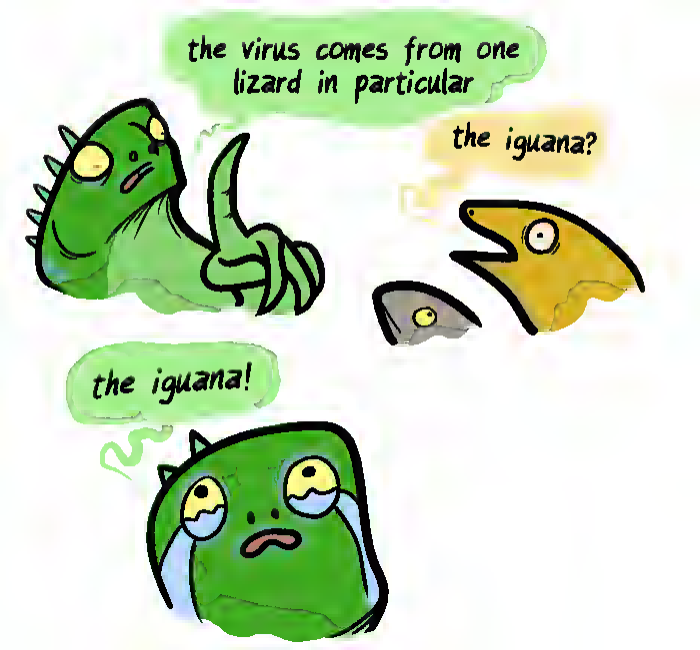
it's not to protect me, it's to protect you
gasp

i recently learned about the iguana virus



a herpes-like virus isolated from the cultured cells of a lizard
achoo
and my cells are very cultured
they must be.
you read so many books!

But that's not all
oh no!



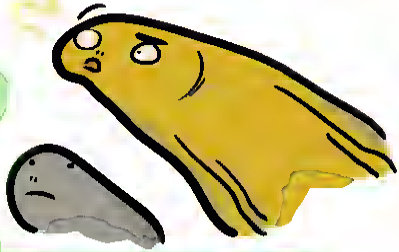
the virus comes from one lizard in particular
the iguana?
the iguana!

but not just any iguana,

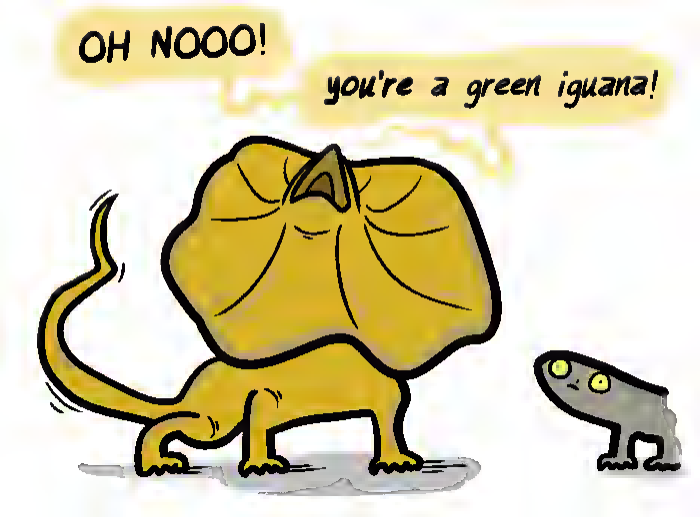
the iguana iguana!

iguana iguana is a thing?

yes, also known as the...



THE GREEN IGUANA!



OH NOOO!
you're a green iguana!

which is why i must wear this
life is so unfair!

solidarity?
